

SPECIALIZED WELDING SERVICES

Precision welding and fabrication solutions for industrial, structural, and custom-engineered applications.

OUR WELDING ADVANTAGES

- ✓ Multi-Process Welding Expertise
- ✓ Structural Fabrication Capability
- ✓ Cobot Automated TIG Welding
- ✓ 1500W Laser Welding Technology
- ✓ WQT Qualified Welders
- ✓ WPS Controlled Processes

Process	Description
GTAW / TIG	High-precision welding for stainless steel, aluminium and critical assemblies
GMAW / MIG	Efficient fabrication for medium to heavy structural components
SMAW	Robust field and structural welding applications
Laser Welding	1500W handheld laser system for low distortion and clean finishes

All welding activities are carried out by WQT-qualified personnel and governed by approved Welding Procedure Specifications (WPS), ensuring quality, consistency, and compliance across a wide range of materials.
